

CNI-1500 CNI-2500

CNC Lathe

- 2 CNC copiers
- IntorEDIT. Exclusive software for woodturning.
- Maximum turning diameter 300 mm. and sq. section 210x210
- Maximum turning length 1500 / 2500 mm.

WOODWORKING MACHINERY

CNI-1500/2500

CNI-1500/2500

CNC lathe with manually feeder equipped with 2 CNC copiers and two tool-holder units for making dowels .

A one-piece, heavy duty, cast iron frame assures vibration-free, height quality turnings. Due to the CNC technology, set up and change over is extremely fast.

Carriage mounted on precision hardened and ground linear bearings. A large, high precision ball screw driven by servo motor assures precise and smooth movement.

As an option can be equipped with a milling drive head for twisting and fluting controlled by a CNC.

Moreover, is also possible to add another programme on the machine which allows to turn by the roughing copier and then twisting or fluting by the finishing copier where there will be a drive head milling assembled

Technical specifications

Maximum turning length	1500/2500 mm
Maximum turning diameter	300mm
	(sq. section 210 mm.)
Power rating, head drive motor	8 - 12 HP
Power rating, hydraulic central motor	2,2 HP
Total installed power rating	21 Kw
Net weight	3450/3650 Kg.
Size	3.50x1.80x2.10(h) /4.20x1.80x2.10 (h)
